Dear [Redacted]

We have carefully studied the report of the Panel of Scientific Consultants on the subject of "Unidentified Flying Objects," which you sent this Agency on March 13.

The conclusions of the Panel and its recommendations, particularly in terms of public education, are of considerable interest in connection with the civil defense program. We appreciate your indicated willingness to assist in implementing the appropriate aspects of the Panel's report as applicable to Civil Defense, and suggest that a conference be arranged for a full discussion of the subject on a mutually satisfactory date.

Sincerely,

Val Peterson
